## Why do shippers read Sailings ?

### Mr. Herman Asalee, PT. Indofood Sukses Makmur Tbk

Sailings is the best shipping magazine for up to date information and knowledge about logistics, shipping, transportation and supply chain management (SCM). As an exporter and a shipper, I have the best partner.

### Mr. Rahman Priyono, PT. Philips Indonesia

Sailings is a leading magazine and very useful for logistics practitioners, especially those who involved in shipping and forwarding. A magazine, like this, is especially important in an archipelago country like Indonesia. For the future, I foresee many more businessmen using Sailings as their reference.

### Mr. Khasilam, PT. Bima Dongin Sports (Eagle)

With only a little money, we get all the information that we need.

## A. Exports

The value of Indonesia's exports in May 2024 reached US\$22.33 billion, increased 13.82 percent compared to exports in April 2024 and increased 2.86 percent compared to May 2023.

Non-oil and gas exports in May 2024 reached US\$20.91 billion, increased 14.46 percent compared to non-oil and gas exports in April 2024 and increased 2.50 percent compared to May 2023.

Cumulatively, Indonesia's exports during January–May 2024 reached US\$104.25 billion, decreased 3.52 percent over the same period in 2023. Likewise, non-oil and gas exports reached US\$97.58 billion or decreased 3.84 percent.

Most of the top ten commodities of non-oil and gas exports in May 2024 experienced increase, and the highest increase was electrical machinery and equipment and parts thereof, in amount of US\$263.6 million or increased 26.66 percent from April 2024. On the other hand, the commodity that experience decrease was only animal or vegetable fats and oils, in amount of US\$268.0 million or decreased 14.32 percent.

By industry classification, exports of manufacturing products during period January–May 2024 decreased by 0.63 percent; exports of mining and others also decreased by 14.90 percent; while exports of agriculture, forestry, and fisheries increased by 5.90 percent compared to the same period in 2023.

The main country destinations of non-oil and gas exports in May 2024 were China at US\$4.73 billion, United States at US\$2.18 billion, and India at US\$1.95 billion, with the contribution of the three reached 42.39 percent. Meanwhile, exports to ASEAN and the European Union (27 countries) amounted to US\$3.79 billion and US\$1.61 billion, respectively.

According to the province of origin, the largest exports of Indonesia in January–May 2024 came from Jawa Barat with a value of US\$14.99 billion (14.38 percent), followed by Kalimantan Timur at US\$10.39 billion (9.97 percent) and Jawa Timur at US\$10.35 billion (9.93 percent).

# Exports In May 2024 Reached US\$22.33 Billion, Up 13.82 Percent Compared to April 2024 and Imports in May 2024 Amounted to US\$19.40 Billion, Up 14.82 Percent Compared to April 2024

## B. Imports

Imports of Indonesia in May 2024 were worth US\$19.40 billion, increased by 14.82 percent compared with April 2024, yet decreased by 8.83 percent compared with May 2023.

Imports of oil and gas in May 2024 were worth US\$2.75 billion, decreased by 7.91 percent compared with April 2024, or decreased by 12.34 percent compared with May 2023.

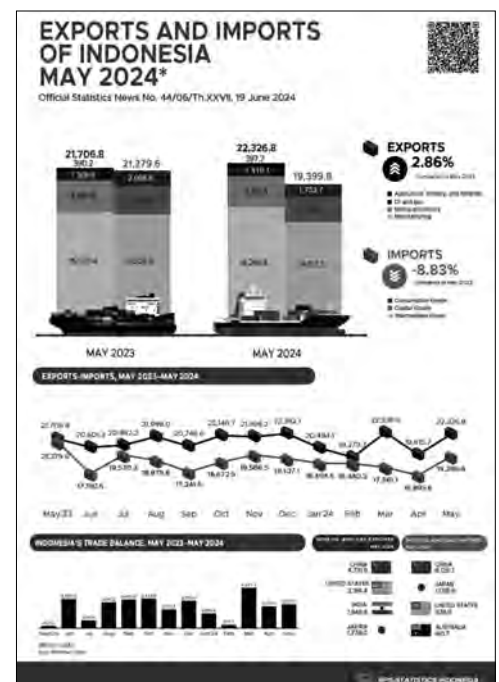

Imports of non-oil and gas in May 2024 were worth US\$16.65 billion, increased by 19.70 percent compared with April 2024, or fell by 8.23 percent compared with May 2023.

The most significant increase in imports of non-oil and gas among the biggest ten commodities in May 2024 was machinery and mechanical appliances and parts thereof which increased by US\$670.3 million (30.17 percent). In contrast, cereals were the only commodity experienced fall by US\$49.5 million (7.70 percent).

The largest trading partner countries of non-oil and gas imports in January–May 2024 were China US\$27.10 billion (35.45 percent), Japan US\$5.35 billion (6.99 percent), and Thailand US\$4.08 billion (5.35 percent). Imports of non-oil and gas from ASEAN and EU countries were US\$13.44 billion (17.58 percent) and US\$4.90 billion (6.41 percent), respectively.

Compared with the same period last year, imports of consumption goods in January–May 2024 experienced the highest rise with a US\$465.2 million (5.68 percent) increase, followed by the increase of capital goods by US\$128.6 million (0.82 percent). In contrast, intermediate goods experience a decrease by US\$980.0 million (1.45 percent).

Indonesia's balance of trade in May 2024 experienced a surplus of US\$2.93 billion, which mainly affected by a surplus of non-oil and gas of US\$4.26 billion. On the other hand, there was a deficit of US\$1.33 billion in oil and gas.

## MSC Upgrades Connectivity In South Africa

**M**editerranean Shipping Company (MSC) has announced it is enhancing its network in Southern Africa to facilitate trade with Europe and other regions.

MSC unveils updates of its NWC to South Africa service and the launch of two new shuttle services:

The NWC to South Africa service offers direct connections between North Europe and South Africa and now to Namibia with a direct call to Walvis Bay.

Namibia Express connecting Cape Town (South Africa) and Walvis Bay (Namibia) can now deliver cargo from all across Europe to Namibia via transshipment by Cape Town.

Mozambique Shuttle connects Walvis Bay (Namibia), Maputo, and Beira (Mozambique) and up to Dar Es Salaam (Tanzania) and Mombasa (Kenya). For cargo import - export Europe, Walvis Bay will serve as a transshipment hub for cargo destined for Maputo and Beira.

Walvis Bay will become its new transshipment hub in Southern Africa's West Coast, facilitating the movement of goods from Europe via our NWC to South Africa service. Additionally, MSC strengthens its intra-Africa network in the region.

### NWC to South Africa:

The revised rotation will start with the MSC Rosaria voyage NZ504A from London Gateway on 20 January 2025.

London Gateway - Rotterdam - Antwerp - Bremerhaven - Le Havre - Sines - Las Palmas - Walvis Bay - Gqeberha (Port Elizabeth) - Durban - Cape Town - Las Palmas - London Gateway

### Namibia Express:

The first sailing will start on 08 January 2025 from Cape Town

with the MSC Himanshi III voyage OA502A, and ETA Walvis Bay on 11 January 2025.

Cape Town - Walvis Bay - Cape Town

### Mozambique shuttle:

The first sailing of will start from Beira on 14 January with the MSC Imma III voyage JO502A, and ETA Walvis Bay on 24 January 2025.

Beira - Walvis Bay - Durban - Maputo - Mombasa - Dar Es Salaam - Beira

Late last year, MSC announced an increase in the Emergency Operation Surcharge (EOS).

## COSCO SHIPPING Enhances Transatlantic Services

**C**OSCO SHIPPING Lines, a subsidiary of COSCO SHIPPING Holdings, has planned to significantly enhance its transatlantic services beginning in February 2025.

The upgrade will reportedly introduce four robust and dependable direct transatlantic services:

- Northwest Europe to the North Atlantic (New York, Norfolk, and Baltimore)
- Northwest Europe to the South Atlantic (Charleston and Savannah)
- Northwest Europe to the Gulf of the US and Mexico (Veracruz, Altamira, Houston, and New Orleans)
- Northwest Europe to Central and West America (Los Angeles and Oakland)

According to COSCO SHIPPING, this expansion will offer a total of 66 direct port-to-port services.

### TAE: Northwest Europe to the North Atlantic

Southampton - Antwerp - Rotterdam - Bremerhaven - Le Havre - New York - Norfolk - Baltimore - Southampton

Following the receipt of necessary regulatory approvals, the new Atlantic route service is scheduled to commence operations in February 2025.

In December 2024, COSCO SHIPPING Specialized Carriers announced a new Southeast Africa direct express weekly service.

## OOCL Names Its Third 16,828 TEU Container Vessel, OOCL Sunflower

**O**rient Overseas Container Line Ltd. ("OOCL") celebrated the naming of its third brand new 16,828 TEU container vessel "OOCL Sunflower" at Dalian COSCO KHI Ship Engineering Co., Ltd. ("DACKS"), according to the company's release.

This series of latest eco-friendly vessels, each with a capacity of 16,828 TEU, incorporates cutting-edge technology that delivers exceptional intelligence, superior environmental performance, and outstanding operational efficiency.

The "OOCL Sunflower" will be serving OOCL's Trans-Pacific Trade ECX1 service. The port rotation is: Hong Kong / Yantian / Xiamen / Shanghai / New York / Savannah / Charleston / Laem Chabang / Cai Mep / Hong Kong in a 91-day round trip.

"Orient Overseas Container Line" and "OOCL" are trade names for transportation provided separately by: Orient Overseas Container Line Limited ("OOCL") and OOCL (Europe) Limited respectively and both are wholly-owned subsidiaries of Orient Overseas (International) Limited, a public company listed on the Hong Kong Stock Exchange. Headquartered in Hong Kong, China, OOCL is one of the world's largest integrated international container transportation and logistics companies, with about 130 offices in more than 100 major cities. Linking Asia, Europe, the Americas, Africa and Oceania, the company offers transportation services to all the major trading economies of the world.

## Maersk Tops Schedule Reliability Rankings in November 2024

**G**lobal schedule reliability increased by 4.1 percentage points month on month (MoM) to 54.8 per cent in November 2024.

Sea-Intelligence has released issue 160 of the Global Liner Performance (GLP) report, which includes schedule reliability numbers through November 2024.

This thorough analysis looks into reliability in 34 trade channels and more than 60 carriers. The following is a summary of the report's key global results.

Despite the MoM improvement, schedule reliability in 2024 has stayed primarily between 50 per cent and 55 per cent.

The average delay for LATE vessel arrivals improved, decreasing by -0.43 days MoM to 5.41 days. Despite the improvement, this is the second-highest figure for the month, only surpassed by the pandemic high of 2021.

Maersk was the most reliable top 13 carrier in November 2024, with schedule reliability of 61.9 per cent.

There were eight carriers with schedule reliability ranging from 50 per cent to 60 per cent, with the remaining five falling between 47 per cent and 50 per cent.

Wan Hai has the lowest schedule reliability (47.3 per cent). In November 2024, the difference between the most and least trustworthy carriers was less than 15 percentage points.

All of the top 13 global carriers improved their schedule reliability month after month, with PIL having the biggest rise of 14.6 per cent points.

On a year-over-year basis, only Yang Ming improved, while six carriers had double-digit decreases.

In October 2024, Sea-Intelligence reported that global schedule reliability increased by 0.9 percentage points month on month (MoM) to 51.5 per cent.

## East Kalimantan Government Converts Ex-Coal Mining Lands to Paddy Fields

**S**amarinda. The East Kalimantan government has turned a former mining area in the provincial capital Samarinda into agricultural land for rice cultivation. Acting Governor Akmal Malik said this initiative supports food self-sufficiency and the free nutritious meals program introduced by President Prabowo Subianto.

“Rice planting on former mining land is more productive compared to conventional paddy fields,” Akmal said on Thursday.

Akmal explained that the rice harvested on former mining land will increase the amount of paddy output. From this planting, the provincial government is optimistic that they will achieve rice harvests of up to four tons per hectare.

“The harvest from rice planting on former mining land can produce much more paddy compared to yields from typical rice fields,” he said.

Akmal further elaborated that the total area of former mining land in East Kalimantan is estimated to exceed 200,000 hectares. If half of this land is converted and cultivated for agriculture, East Kalimantan is expected to achieve food self-sufficiency by 2026.

“Imagine there are 200,000 hectares [of ex-mining lands] and if we use half of them for rice planting, we will be able to achieve self-sufficiency in food,” he said.

## Indonesia To Roll Out Sweetened Beverage Excise by Second Half Of 2025

**T**he government plans to implement an excise for sweetened beverages starting in the second half of 2025, according to the Finance Ministry.

To implement the policy, the government has included the planned roll out in this year's state budget law, as stipulated in the 2021 Law on Tax Harmonization.

“The regulation is scheduled for the second half of 2025. It's part of the legal framework established in the 2025 State Budget Law,” said Nirwala Dwi Heryanto, the ministry's customs and excise directorate general spokesperson, as quoted from Kumparan.

The government will introduce a government regulation and a ministerial regulation to define the tax's scope and thresholds, Nirwala noted.

“Not all beverages will be taxed; those below a certain sugar content will be exempt,” explained Nirwala.

He added that the excise would apply to both factory-made and store-sold sweetened beverages, including those from coffee shops and bubble tea (boba) outlets.

The proposed levy is expected to boost excise revenue and curb excessive sugar consumption among the population, which health experts have linked to a sharp rise in diabetes cases.

The 2023 Indonesia Health Survey (SKI), recently issued by the Health Ministry, found that around 11.7 percent of Indonesia's 270 million population suffered from diabetes.

The figure increased by 3.2 percentage points to 8.5 percent compared with 2018, according to the same data.

Read also: Industry Ministry floats incentives to make sweet drinks excise less bitter

Experts have attributed Indonesia's rising diabetes prevalence to a growing societal shift toward sedentary lifestyles and unhealthy diets, including the increasing

popularity of sugary drinks.

The country saw a 15-fold increase in the annual consumption of sugary drinks in the last two decades: From 51 million liters in 1996 to 780 million liters in 2014, according to the Center for Indonesia's Strategic Development Initiatives (CISDI). Such an increase has placed Indonesia as the third-highest consumer of sweetened beverages in Southeast Asia.

The implementation of a sugary drinks excise has faced repeated delays since the Finance Ministry first proposed it in 2009, but progress stalled mainly due to opposition from businesses, which argue it might exacerbate inflation and hurt the industry.

Concrete steps only emerged in 2021 when the government stipulated the excise in the Tax Harmonization Law, passed by lawmakers in that year.

Following the taxation law, the government had planned a roll out as early as 2023 by including a revenue target for the excise in that year's state budget, but it never implemented the collection. A similar situation occurred in 2024.

On multiple occasions, the Finance Ministry has reiterated that it would consider the current economic condition when introducing the excise.

According to the 2025 state budget, the government has set a Rp 3.08 trillion (US\$190.3 million) revenue target from the excise on sweetened beverages, much lower than the Rp 4.3 trillion stipulated in the 2024 state budget.

Nailul Huda, digital economy director at the Center of Economic and Law Studies (Celios), proposed implementing a progressive ad valorem tax, which is calculated based on the value of a transaction, tied to sugar content, to increase revenue from the excise. “The higher the sugar level, the higher the tax imposed on producers,” he said on Sunday, as quoted from Kumparan.

# CONTAINER SPECIFICATIONS

## DRY CARGO CONTAINERS

### • DIMENSIONS

| Type  | Container Weight |           |          | Interior Measurement |           |            |                            | Door Open |            |
|-------|------------------|-----------|----------|----------------------|-----------|------------|----------------------------|-----------|------------|
|       | Gross (kg)       | Tare (kg) | Net (kg) | Length (m)           | Width (m) | Height (m) | Capacity (m <sup>3</sup> ) | Width (m) | Height (m) |
| 20 ft | 24,000           | 2,370     | 21,630   | 5.898                | 2.352     | 2.394      | 33.20                      | 2.343     | 2.280      |
| 40 ft | 30,480           | 4,000     | 26,480   | 12.031               | 2.352     | 2.394      | 67.74                      | 2.343     | 2.280      |

### • CHARACTERISTICS

Manufactured from either Aluminium or steel, they are suitable for most types of cargo / general cargo. Aluminium containers have a slightly larger payload than steel, and steel containers have a slightly larger internal cube

## REFRIGERATED CONTAINERS

### • DIMENSIONS

| Type  | Container Weight |           |          | Interior Measurement |           |            |                            | Door Open |            |
|-------|------------------|-----------|----------|----------------------|-----------|------------|----------------------------|-----------|------------|
|       | Gross (kg)       | Tare (kg) | Net (kg) | Length (m)           | Width (m) | Height (m) | Capacity (m <sup>3</sup> ) | Width (m) | Height (m) |
| 20 ft | 24,000           | 3,050     | 20,950   | 5.449                | 2.290     | 2.244      | 26.70                      | 2.276     | 2.261      |
| 40 ft | 30,480           | 4,520     | 25,960   | 11.690               | 2.250     | 2.247      | 57.10                      | 2.280     | 2.205      |

### • CHARACTERISTICS

Recommended for delicate cargo. Bottom-air delivery system ensures refrigerated cargo reaches its destination in optimum condition.

## OPEN TOP CONTAINERS

### • DIMENSIONS

| Type  | Container Weight |           |          | Interior Measurement |           |            |                            | Door Open |            |
|-------|------------------|-----------|----------|----------------------|-----------|------------|----------------------------|-----------|------------|
|       | Gross (kg)       | Tare (kg) | Net (kg) | Length (m)           | Width (m) | Height (m) | Capacity (m <sup>3</sup> ) | Width (m) | Height (m) |
| 20 ft | 24,000           | 2,580     | 21,420   | 5.629                | 2.212     | 2.311      | 32.00                      | 2.330     | 2.263      |
| 40 ft | 30,480           | 4,290     | 26,190   | 11.763               | 2.212     | 2.311      | 65.40                      | 2.330     | 2.263      |

### • CHARACTERISTICS

Allowing cargo to be loaded from the top, open top containers are particularly suitable for bulky cargo such as machinery. They are fitted with a PVC tarpaulin cover and attachable bows with cable sealing devices. The container doors can be removed to make the stuffing of cargo more convenient. Manufactured from steel

## FLAT RACK CONTAINERS

### • DIMENSIONS

### • CHARACTERISTICS

Flatracks are especially suited to heavy loads or cargo that needs loading from the top or sides, such as pipes and machinery. There are collapsible and non-collapsible containers with or without walls. Manufactured from steel.

## GARMENT CONTAINERS

### • DIMENSIONS

| Type  | Container Weight |           |          | Interior Measurement |           |            |                            | Door Open |            |
|-------|------------------|-----------|----------|----------------------|-----------|------------|----------------------------|-----------|------------|
|       | Gross (kg)       | Tare (kg) | Net (kg) | Length (m)           | Width (m) | Height (m) | Capacity (m <sup>3</sup> ) | Width (m) | Height (m) |
| 20 ft | 24,000           | 2,240     | 21,760   | 5.898                | 2.352     | 2.394      | 33.20                      | 2.343     | 2.280      |
| 40 ft | 30,480           | 3,885     | 26,595   | 12.031               | 2.352     | 2.394      | 67.74                      | 2.343     | 2.280      |

### • CHARACTERISTICS

Use for all kinds of garment. The containers are specially designed for garment product and related industry. There are some options of using a string or bar system or a combination of both. The containers allow increased flexibility, greater load Internal Capacity and savings on transportation and handling cost.

## HIGH CUBE CONTAINERS

### • DIMENSIONS

| Type  | Container Weight |           |          | Interior Measurement |           |            |                            | Door Open |            |
|-------|------------------|-----------|----------|----------------------|-----------|------------|----------------------------|-----------|------------|
|       | Gross (kg)       | Tare (kg) | Net (kg) | Length (m)           | Width (m) | Height (m) | Capacity (m <sup>3</sup> ) | Width (m) | Height (m) |
| 40 ft | 30,480           | 3,980     | 26,500   | 12.031               | 2.352     | 2.698      | 76.30                      | 2.340     | 2.585      |
| 45 ft | 30,480           | 4,800     | 25,680   | 13.544               | 2.352     | 2.698      | 86.00                      | 2.340     | 2.585      |

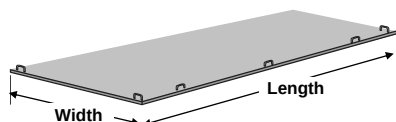

### • CHARACTERISTICS

With high cube containers, you gain an extra foot in height compared with general-purpose containers. Ideal for light, voluminous cargo or bulky cargo. These extra volume containers come in steel and aluminium.

Note : For Reference only. Please contact your shipping companies or forwarders for more details.

## AQ7

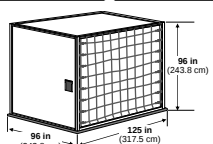

IATA ID CODE : **AMD**  
Classification : **M-1H**  
Rate Class : **Type 2H**

| BASE SIZE   |          |
|-------------|----------|
| Length      | 317.5 cm |
| Width       | 243.8 cm |
| Height      | 229.7 cm |
| Tare Weight | 370 kg   |

### WEIGHT LIMITATION

| Max. Gross Weight (kg) | Internal Volume (m³) |
|------------------------|----------------------|
| 6,800                  | 19.9                 |

## AMA Rectangular Container

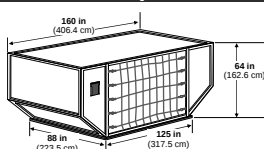

IATA ID CODE : **AMA**  
Classification : **M-1**  
Rate Class : **Type 2**

| BASE SIZE   |          |
|-------------|----------|
| Length      | 317.5 cm |
| Width       | 243.8 cm |
| Height      | 243.8 cm |
| Tare Weight | 350 kg   |

### WEIGHT LIMITATION

| Max. Gross Weight (kg) | Internal Volume (m³) |
|------------------------|----------------------|
| 6,804                  | 17.7                 |

## AAF Container (lower deck)

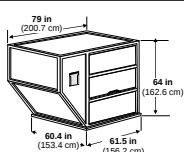

IATA ID CODE : **AAF**  
Classification : **LD-26**  
Rate Class : **Type 5**

| BASE SIZE   |          |
|-------------|----------|
| Length      | 317.5 cm |
| Width       | 223.5 cm |
| Height      | 162.6 cm |
| Tare Weight | 250 kg   |

### WEIGHT LIMITATION

| Max. Gross Weight (kg) | Internal Volume (m³) |
|------------------------|----------------------|
| 6,033                  | 13.3                 |

## AKE Container

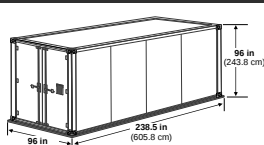

IATA ID CODE : **AKE**  
Classification : **LD-3**  
Rate Class : **Type 8**

| BASE SIZE   |          |
|-------------|----------|
| Length      | 156.2 cm |
| Width       | 153.4 cm |
| Height      | 162.6 cm |
| Tare Weight | 82 kg    |

### WEIGHT LIMITATION

| Max. Gross Weight (kg) | Internal Volume (m³) |
|------------------------|----------------------|
| 1,588                  | 4.5                  |

## AGA Container

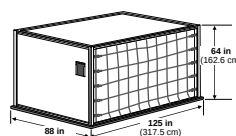

IATA ID CODE : **AGA**  
Classification : **M-6**  
Rate Class : **Type 1**

| BASE SIZE   |          |
|-------------|----------|
| Length      | 605.8 cm |
| Width       | 243.8 cm |
| Height      | 243.8 cm |
| Tare Weight | 1,000 kg |

### WEIGHT LIMITATION

| Max. Gross Weight (kg) | Internal Volume (m³) |
|------------------------|----------------------|
| 11,340                 | 33                   |

## AAP Container (Garments)

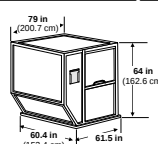

IATA ID CODE : **AAP**  
Classification : **LD-9**  
Rate Class : **Type 5**

| BASE SIZE   |          |
|-------------|----------|
| Length      | 317.5 cm |
| Width       | 223.5 cm |
| Height      | 162.6 cm |
| Tare Weight | 215 kg   |

### WEIGHT LIMITATION

| Max. Gross Weight (kg) | Internal Volume (m³) |
|------------------------|----------------------|
| 6,000                  | 9.1                  |

## RKN Container (Reefer)

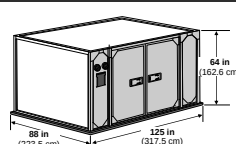

IATA ID CODE : **RKN**  
Classification : **LD-3**  
Rate Class : **Type 8**

| BASE SIZE   |          |
|-------------|----------|
| Length      | 156.2 cm |
| Width       | 153.4 cm |
| Height      | 162.6 cm |
| Tare Weight | 210 kg   |

### WEIGHT LIMITATION

| Max. Gross Weight (kg) | Internal Volume (m³) |
|------------------------|----------------------|
| 1,587                  | 3.0                  |

## RAP Container

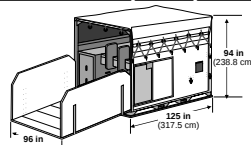

IATA ID CODE : **RAP**  
Classification : **LD-9 Reefer**  
Rate Class : **Type 5**

| BASE SIZE   |          |
|-------------|----------|
| Length      | 317.5 cm |
| Width       | 223.5 cm |
| Height      | 162.6 cm |
| Tare Weight | 400 kg   |

### WEIGHT LIMITATION

| Max. Gross Weight (kg) | Internal Volume (m³) |
|------------------------|----------------------|
| 6,000                  | 9.6                  |

## Horse Stall (HMC) Container

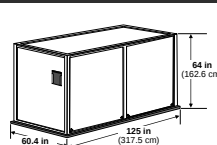

IATA ID CODE : **HMC / HMA**  
Classification : **MD-11F**  
Rate Class : **Type 2**

| BASE SIZE   |          |
|-------------|----------|
| Length      | 317.5 cm |
| Width       | 243.8 cm |
| Height      | 238.8 cm |
| Tare Weight | 1,310 kg |

### WEIGHT LIMITATION

| Max. Gross Weight (kg) | Internal Volume (m³) |
|------------------------|----------------------|
| 3,500                  | 18.4                 |

## ALP Container

IATA ID CODE : **ALP**  
Classification : **LD-11**  
Rate Class : **Type 6**

| BASE SIZE   |          |
|-------------|----------|
| Length      | 317.5 cm |
| Width       | 153.4 cm |
| Height      | 162.6 cm |
| Tare Weight | 185 kg   |

### WEIGHT LIMITATION

| Max. Gross Weight (kg) | Internal Volume (m³) |
|------------------------|----------------------|
| 3,176                  | 7.2                  |

The following guide has been developed from materials supplied by IATA (International Air Transport Association) and the ATA (Air Transport Association of America). This guide lists and illustrates the average external dimensions and weight limitations of the primary containers in use today. Exact dimensions and weight limitations will vary by manufacturer and availability will vary. Therefore please inquire the precise specifications with your airline or freight forwarder when arranging your shipment.

## Freight Transport Via China-Vietnam Cross-Border Trains Posts Rapid Growth

The Nanning branch of China Railway Group Limited reported a sharp increase in freight transport on the China-Việt Nam cross-border railway last year, with trains departing from Guangxi carrying a total of 19,670 containers, marking a staggering annual increase of 1,153 per cent.

Notably, monthly freight volumes hit record highs five times during the year, in March, April, July, October and November.

Initially focusing on transporting construction materials and light industrial products, the railway's cargo categories expanded to high-tech electronics, precision machinery, premium consumer goods and speciality farm produce. Its list of transported goods now encompasses 262 categories, sourced from 25 provinces and cities across China, with the trade route connecting to multiple ASEAN countries, including Việt Nam, Laos and Thailand.

Currently, the Nanning branch operates three fixed weekly cross-border freight trains running through the Việt Nam-China border, ensuring a steady supply of goods to the market. Daily freight services were also introduced in July last year. At the same time, a new route linking Guangzhou and Nanning (China), and An Viên (Việt Nam) was launched, creating a fresh cross-border corridor for exports from the Guangdong-Hong Kong-Macau Greater Bay Area to Việt Nam.

Li Na, business director of the Nanning Public Transport Group Co., Ltd, said that its goods such as furniture, home appliances and ceramic tiles are now regularly transported to Đồng Đăng and An Viên in Việt Nam. Using the China-Việt Nam cross-border freight train has significantly reduced shipping times for the company. Its business activities have been expanded from Việt Nam to other ASEAN markets, including Cambodia and Thailand.

## Ocean Freight Market Outlook in Good Shape – DHL

The outlook for ocean freight market remains healthy as the year draws to a close, according to the latest

DHL Ocean Freight Market Update. The demand is driven by early Lunar New Year and anticipated policy changes in the US.

China's exports are exceeding forecasts as factories rush production to meet demand ahead of possible trade adjustments.

Some container lines have reported full bookings from Asia into the Americas, likely due to shippers adjusting schedules in response to the new tariffs under Donald Trump.

The outlook for the ocean freight market remains healthy as the year draws to a close, driven by the early Lunar New Year as well as anticipated policy changes in the US, according to the December DHL Ocean Freight Market Update.

Specifically, China's exports are exceeding forecasts as factories rush production to meet demand ahead of possible trade adjustments.

Niki Frank, CEO of DHL Global Forwarding Asia Pacific, said: "We are seeing steady demand, though the market is reacting more slowly than many were expecting given the disruption on the radar."

He added that if the typical season trend holds, the company expects a "slight bump" toward December and January.

Based on the report, underlying trends remain favorable, with subzero core goods inflation and decreasing services inflation in the G5 economies.

The DHL Ocean Freight Market Update Report is a monthly publication by DHL Global Forwarding which tracks and analyses the latest developments of the global ocean freight market.

Its capacity outlook states that disruptions on services can be expected as alliances are shifting to their new set up, mainly on East-West trades.

The report noted idle fleet of container ships hit an all-time low of less than 1% this year, with larger ships of 12,500+ showing almost no idling.

Yearly dry container production,

meanwhile, could hit 7.3 million TEU, surpassing previous years with a 6.5% year-on-year growth.

Freight rates stayed much higher compared to last year, and there is an expected rush to bring in US imports before the new tariffs planned by President-elect Donald Trump go into effect.

Transpacific freight rates, however, have shown small decreases, even as several carriers announced new rates beginning Dec. 1 in anticipation of the Lunar New Year rush.

The expected new "Trump tariffs" take effect when he assumes office in January, creating mid-term uncertainty for the US's largest trading partners, namely China, Canada, and Mexico.

In another development, the Red Sea crisis continues with no clear end in sight.

The global container market continued to recover in the third quarter of 2024, with indications that it will stay on track for the remainder of the year.

The manufacturing sector had an ever so slight hike in output in October after falling in September.

With the exception of emerging markets, the International Monetary Fund expects world trade growth to recover strongly this year, continuing until next year.

A notable market development this year was the reduced capacity of carriers due to closed loops and the replacement of large ships with smaller vessels.

At yearend, outbound Asia rates stayed volatile as demand stayed strong, due to the Lunar/Chinese New Year boost.

However, adverse weather conditions contributed to vessel delays and equipment imbalances.

Congestion became an issue, although there was marked improvement by October. Heavy winds had caused Antwerp to face delays, and UK and German ports experienced heightened congestion.

Congestion remained a problem in such US ports as New York, Norfolk, Charleston, and Savannah, while Canadian ports resumed full operations after recent strikes.

## Port Of Tanjung Pelepas Closes 2024 With More Than 12 million Teus

**P**ort of Tanjung Pelepas (PTP) has become the first container terminal in Malaysia to handle over 12.25 million TEUs in a single year for the year 2024.

This achievement surpassed PTP's previous record of 11.2 million TEUs set in 2021.

The 12 millionth TEU was recorded at about 7.00 pm on 23 December 2024. Additionally, on 22 September 2024, PTP achieved an exceptional 14,036 quayside moves within a 12-hour shift.

In July 2024, PTP achieved its highest monthly milestone, handling 1.1 million TEUs.

These achievements are part of a sustained performance that has seen PTP handle over 1 million TEUs monthly for seven months since May 2024. In December 2024, PTP successfully implemented Kaleris' Navis N4 4.0 container terminal operating system, a key upgrade to support future volume growth while maintaining operational excellence.

PTP is now ranked as the fifth most efficient container port in the world, according to the Container Port Performance Index (CPPI) 2023 by The World Bank and S&P Global Market Intelligence. PTP is also ranked 15th among the world's top container ports in terms of volume throughput, as highlighted by Lloyd's List.

PTP Chairman, Tan Sri Che Khalib Mohamad Noh, expressed: "2024 has been nothing short of extraordinary. It is gratifying to witness how PTP has risen to the occasion, embracing challenges with courage and transforming them into opportunities for growth and innovation."

"Our record-breaking performance underscores PTP's indispensable role in global supply chains. This milestone is a testament to the dedication, resilience and hard work of the entire PTP team.

"By seamlessly handling such substantial container volumes, we have consistently delivered exceptional services to our valued customers and partners, contributing to Malaysia's economic growth and reaffirming PTP's position as one of the world's most efficient and high-volume container terminals."

Echoing the Chairman's sentiments, PTP Chief Executive Officer, Mark Hardiman, remarked: "Our goal is to sustain this momentum and achieve even greater milestones in 2025 and beyond.

"We have made extensive preparations for the future, focusing not only on port asset upgrades and infrastructure enhancements but also on advancing our environmental, social and governance (ESG) agenda, strengthening safety policies and driving our digitalisation strategies.

"These efforts ensure continuous improvements and expansions as we anticipate a significant increase in volume in the coming year."

Last summer, Aidrivers and Terberg Tractors Malaysia (TTM) successfully completed Phase 2 of their autonomous operations capability demonstration at the Port of Tanjung Pelepas (PTP).

## Indian Ports Sector Rebounds With 5.3% YoY Growth in Dec 2024

**T**he Indian Ports sector witnessed a 5.3 per cent year-on-year growth in December 2024, marking a recovery after a two-month decline of 1.8 per cent year-on-year during October and November. This growth was primarily driven by increased container volumes at major ports (MPs) and strong performance by Adani Ports and Special Economic Zone (APSEZ), India Shipping News reported.

Cargo handled by MPs rose 3.3 per cent year-on-year in December, following a 3.7 per cent decline in the previous two months.

Containers at MPs demonstrated robust growth, increasing by 17.6 per cent year-on-year, while petroleum, oil, and lubricants (POL) cargo rose by 4.4 per cent year-on-year. However, coal cargo at MPs saw a 15 per cent decline, with thermal coal dropping 1 per cent and coking coal falling 36.1 per cent year-on-year, reflecting muted demand compared to the 5 per cent growth seen in the second quarter of FY25.

Jawaharlal Nehru Port (JNPT), a key container port among MPs, recorded an 1 per cent year-on-year growth in container volumes, sustaining strong performance after a 12.1 per cent rise in November-December 2024.

APSEZ volumes also rebounded, rising by 7.7 per cent year-on-year in December 2024 after a modest 1.2 per cent growth in October and November. APSEZ's total cargo volume for December stood at 38.4 million tonne, with India-specific volumes (excluding Gangavaram and Karaikal) growing by an estimated 10 per cent year-on-year, matching the growth rate seen in the second quarter of FY25.

APSEZ's FY25 guidance of 460-480 million tonne indicates a 6-11 per cent organic volume growth, supported by contributions from new assets. These include 6 million tonne from Gopalpur (acquired in Q2), 6 million tonnes from Tanzania, and 2-3 million tonne from Vizhinjam, which became operational in December 2024.

## Jakarta Airports Tighten HMPV Surveillance with Thermal Scanners and Health App

**H**ealth workers at Soekarno-Hatta (Soetta) and Halim Perdanakusuma Airports in Jakarta have increased surveillance efforts to prevent the spread of human metapneumovirus (HMPV).

One of the measures taken is the use of thermal scanners at the international arrival gates, and passengers arriving from abroad are required to fill out an app called the Satu Sehat Health Pass (SSHP).

Through SSHP data, the passenger's risk status will be marked with a specific color: red for passengers showing symptoms, orange for those in close contact with infected individuals, yellow for passengers from affected countries, and green for passengers not showing any risk indications. If there are passengers with symptoms or indications of risk, health officers will conduct further examinations at the health posts or laboratories available at Soetta Airport.

Naning added that officers will perform visual validation using thermal scanners and direct observation at the arrival gates. If there are passengers with indications of risk, further checks will be carried out at the health posts or laboratory in Terminal 3 of Soetta Airport.

So far, no cases of HMPV have been reported at Soetta or Halim Perdanakusuma airports.

Previously, the Health Ministry reported that HMPV has been found in Indonesia. All cases involved children. Health Minister Budi Gunadi Sadikin urged the public not to panic, as HMPV is not a new virus and has been recognized in the medical community.

The minister explained that HMPV is different from the COVID-19 virus. He said that COVID-19 is a new virus, while HMPV is an older virus that behaves similarly to the flu. The human immune system has been familiar with this virus for a long time and can respond effectively.

## Air Cargo Demand Grows 8.2% in Nov - IATA

**A**ir cargo demand grew for the 16th consecutive month in November 2024, the International Air Transport Association (IATA) said in a statement.

Total demand, measured in cargo ton-kilometers, rose 8.2% year-on-year in November.

International operations jumped 9.5%. Capacity, measured in available cargo ton-kilometers, increased 4.6% compared to November 2023 (6.5% for international operations).

"It was a good November for air cargo with 8.2% demand growth nearly doubling the 4.6% growth in cargo capacity. Fuel costs tracked at 22% below previous-year levels and tight market conditions supported yield growth at 7.8%. All things considered, we are looking to close out 2024 air cargo performance on a profitable note," said Willie Walsh, IATA director general.

Walsh noted the potential for continued strong performance in 2025 but flagged downside risks such as inflation, geopolitical uncertainties, and trade tensions.

IATA said several factors should be noted:

Industrial production grew by 2.1% year-on-year in October. Global goods trade expanded for the seventh consecutive month, rising by 1.6%.

The Purchasing Managers' Index for global manufacturing output remained above 50, signaling growth, though the PMI for new export orders stayed below 50, suggesting persistent uncertainties in global trade.

US headline inflation, based on the annual Consumer Price Index, rose by 0.1 percentage point to 2.7% in November. In the same month, the inflation rate in the EU increased by 0.2 percentage point to 2.5%. China's consumer inflation fell to 0.2% in November, continuing concerns of an economic slowdown.

### Regional performance:

- Asia-Pacific airlines: Led all regions with 13.2% year-on-year demand growth and 9.4% capacity growth.
- North American carriers: Demand increased by 6.9% with capacity up by 2.2%.
- European: Demand rose by 5.6%, capacity by 4.3%.
- Middle East: Demand grew by 3.6% but capacity declined by 0.6%.
- Latin America: Demand surged by 11.6%; capacity grew by 6.4%.
- Africa: Demand slipped by 0.7% while capacity increased by 0.4%.

IATA said international routes experienced exceptional traffic levels for the 16th consecutive month with a 9.5% year-on-year increase in November with airlines benefiting from rising e-commerce demand in the US and Europe amid ongoing capacity limits in ocean shipping.

### Number of Loading Cargo at 5 Main Airports in Indonesia, 2024 (Tons)

Airports: Kualanamu, Soekarno Hatta, Juanda, Ngurah Rai and Hasanudin
