DITP and RX BITEC Unlock ASEAN Supply Chains' Power Bringing 415+ Leading Logistics Solutions to "TILOG - LOGISTIX 2026"

The Department of International Trade Promotion (DITP), Ministry of Commerce, Thailand, in collaboration with RX BITEC, ASEAN's leading exhibition organizer, announces its readiness to stage "TILOG - LOGISTIX 2026", ASEAN's most comprehensive exhibition on technologies and services for warehouse management, loading, packing, material handling, and logistics services on August 19th - 21st, 2026, from 10.00 - 18.00 hrs., at Hall 98, BITEC, Bangkok.

Now in its 9th edition, **TILOG - LOGISTIX 2026** is being held at a pivotal time as businesses navigate evolving global trade dynamics and increasingly stringent trade regulations by restructuring supply chains and reassessing production strategies. Against this backdrop, Thailand's strategic position is gaining ground as foreign investment continue to grow and companies accelerating supply chain diversification into ASEAN. TILOG - LOGISTIX 2026 brings together comprehensive solutions across five key categories to help businesses improve operational efficiency and strengthen supply chain competitiveness: automated material handling and robotics including AGVs and AMRs; smart warehouse, storage, and loading technology; AI, IoT, and e-logistics software; end-to-end packing and palletizing systems; and a full spectrum of logistics service providers (LSPs), all to be showcased under one roof at Bangkok International Trade and Exhibition Centre (BITEC).

This year, TILOG - LOGISTIX 2026 will create opportunities for every participant to empower their logistics capabilities with innovations from over 415 leading brands, 25 countries, to showcase integrated solutions designed to effectively reduce costs, improve end-to-end logistics efficiency, and enforce sustainability.

Under the theme of "Empowering Global Trade with Generative Supply Chains," the exhibition will offer valuable opportunities for business professionals from a wide range of industries, including Automotive, Food & Beverage, E-Commerce & Retailers, Electronics, and Personal Care Products to empower their warehouse management and logistics endeavor with the right trade partners to pursue next-level technological and operational transformation.

Key highlights and major activities at this year's event include a range of special programs designed to support business networking and knowledge exchange, including:

Innovation Showcase

A special zone featuring cutting-edge innovations, smart technologies, and advanced logistics solutions driving the future of the logistics industry, enabling entrepreneurs to explore practical applications for their businesses.

ELMA 2026 Award Presentation Ceremony and Seminar

Recognition of winners of the Excellent Logistics Management Award (ELMA) during the official opening ceremony, followed by a special seminar session featuring award winners and distinguished committee members who will share achievement and encourage Thai LSPs to apply best practices in logistics management in realities of business operation.

Trade Logistics Symposium

To be held on August 20th, 2026 in both morning and afternoon sessions, featuring updates and insights from representatives of the Stock Exchange of Thailand, leading logistics executives, and experts from global organizations with extensive experience in modern logistics and supply chain management. The symposium aims to prepare businesses for fundraising opportunities and support expansion into global trade.

Thailand Logistics Industry Exhibition

A dedicated showcase presenting in-depth insights into three key dimensions: an overview of the capabilities of Thailand's logistics service industry, future industry trends and directions, and success stories from ELMA award winners.

World Transport & Logistics Forum (WTLF)

Organized in collaboration with global organizations such as The World Bank Group, this forum will discuss and provide insights into the Logistics Performance Index (LPI) and its role in enhancing industry competitiveness and operational efficiency.

Business Matching Program

A complimentary service for visitors to find exhibitors online in advance to make appointments to meet them at the event's Business Matching Lounge or at exhibitors' booths.

"TILOG - LOGISTIX 2026"

COVER STORY

PAN OCEAN: Global Leading Shipping And Logistics Company

Sailings®, our flagship, is the official Indonesian trademark for the most essential biweekly transportation and logistics news and information source available. The publication is specially designed for exporters, importers, traders, manufacturers and other transport and logistics professionals in need of the most current and accurate information available.

Created and developed by experienced and dedicated media professionals from across Asia and beyond.

THE MAGAZINE IS ENTIRELY INDEPENDENT OF ANY COMMERCIAL INTERESTS WITHIN THE INDUSTRY, AND DEDICATED TO ALL SHIPPERS.

EDITOR : Santi. OFFICE : Kirana Two, Lantai 10-A, Jl. Boulevard Timur No.88, Jakarta Utara 14250, Indonesia
SAILINGS is published by KEENWELL GLOBAL,PT.

All materials in the magazine are strictly copyrighted and all rights are reserved. Every effort has been taken in compiling the contents of this magazine, but the publisher and PT. KEENWELL GLOBAL must assume no responsibility or liability for any inconveniences, expenses or damages resulting from errors or changes of any kind in the information, including schedules and tariffs contained in this publication. Sailings may in its sole discretion edit, classify or reject at any time any advertising materials submitted.

To address any problems or concerns, outside of this disclaimer, please contact us by email at: cs@e-sailings.com

Estimated Readership: 50,000. The Regional ISM Edition is circulated monthly in Indonesia, Singapore & Malaysia. Available at the esteemed airport lounges.

Over 90% of Sailings readers and advertisers are loyal and prefer to stay smart and stay ahead by familiarizing themselves with Sailings for the sake of stunning benefits.

10 Stunning Benefits of Reading Sailings:

1. Brush up on your knowledge e.g. container specs, incoterms, world ports, fabulous offers, etc.
2. Learn practical and proven tips from experienced insiders and professionals
3. Use it to keep abreast of current and future sailing schedules, regulations, trends and technologies
4. Learn the industry standards
5. Know who's who and your competition
6. Know the latest marketing campaigns about your products/services
7. Get good deals and bargains
8. Get up-to-date business leads for potential customers and potential suppliers
9. Use it as a handy and fast reference tool
10. Leverage on it to keep Working Hard and Working Smart for the good of your company and your customers

besides expanding your knowledge,

Why do shippers read Sailings ?

Mr. Herman Asalee, PT. Indofood Sukses Makmur Tbk

Sailings is the best shipping magazine for up to date information and knowledge about logistics, shipping, transportation and supply chain management (SCM). As an exporter and a shipper, I have the best partner.

Mr. Rahman Priyono, PT. Philips Indonesia

Sailings is a leading magazine and very useful for logistics practitioners, especially those who involved in shipping and forwarding. A magazine, like this, is especially important in an archipelago country like Indonesia. For the future, I foresee many more businessmen using Sailings as their reference.

Mr. Khasilam, PT. Bima Dongin Sports (Eagle)

With only a little money, we get all the information that we need.

THE NUMBER OF INTERNATIONAL AIR TRANSPORT PASSENGERS IN MAY 2026 INCREASED OF 5.98 PERCENT.

The number of domestic air transport passengers in May 2026 was 4.1 million, a decrease of 10.11 percent from April 2026. The passenger decreased at Juanda Airport-Surabaya by 23.26 percent, Kualanamu Airport-Medan by 19.38 percent, Hasanuddin Airport-Makassar by 18.55 percent, and Soekarno Hatta Airport-Tangerang by 8.17 percent. On the contrary, the passenger increased at Ngurah Rai Airport-Denpasar by 4.51 percent. The highest number of passengers, 1.2 million, or 28.39 percent of the total, was recorded at Soekarno Hatta Airport-Tangerang. The second-highest was at Juanda Airport-Surabaya, with 343.8 thousand passengers or 8.37 percent of the total.

The number of domestic air transport passengers from January to May 2026 was 23.3 million, a decrease of 1.63 percent compared to the same period last year, when it was 23.7 million. Soekarno Hatta Airport-Tangerang had the highest number of passengers, 6.5 million, or 27.98 percent of the total. The second was at Juanda Airport-Surabaya, with 2.0 million or 8.52 percent.

The number of international air transport passengers in May 2026 reached 1.7 million, an increase of 5.98 percent from April 2026. The passenger increase occurred at Hasanuddin Airport-Makassar by 36.44 percent, Juanda Airport-Surabaya by 9.47 percent, Ngurah Rai Airport-Denpasar by 5.93 percent, and Soekarno Hatta Airport-Tangerang by 4.27 percent. On the contrary, the number of passengers decreased at Kualanamu Airport-Medan by 11.45 percent. The highest number of passengers was recorded at Soekarno Hatta Airport-Tangerang, reaching 659.1 thousand or 39.89 percent of the total. This was followed by Ngurah Rai Airport-Denpasar with 620.3 thousand passengers or 37.54 percent of the total.

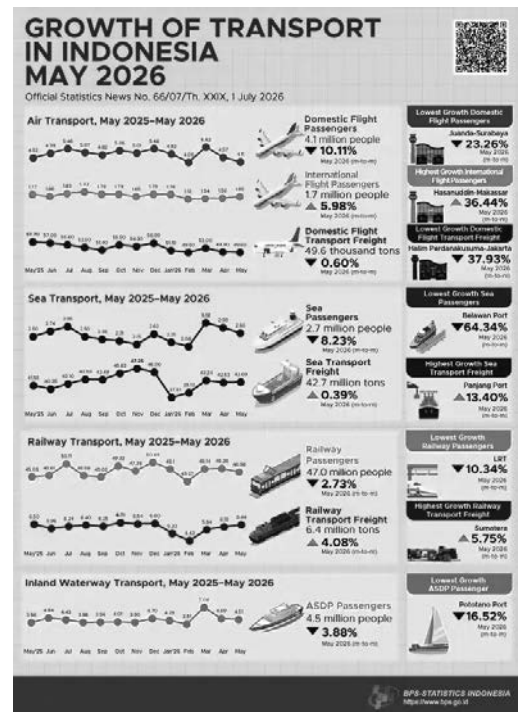

From January to May 2026, the number of international air transport passengers using national or foreign aircraft totaled 8.1 million, a decrease of 0.70 percent compared to

the same period in 2025. The highest number of passengers reached 3.4 million, or 42.80 percent of the total passengers, recorded at Soekarno Hatta Airport-Tangerang, followed by Ngurah Rai Airport-Denpasar with 2.9 million passengers or 35.88 percent of the total.

Freight transported by domestic air in May 2026 was 49.6 thousand tons, a decrease of 0.60 percent from April 2026. The decrease in freight occurred at Halim Perdanakusuma Airport-Jakarta by 37.93 percent and Juanda Airport-Surabaya by 5.41 percent.

On the contrary, the freight increased at Sentani Airport-Jayapura by 24.14 percent, Hasanuddin Airport-Makassar by 8.57 percent, and Soekarno Hatta Airport-Tangerang by 0.61 percent. The highest amount of freight was recorded at Soekarno Hatta Airport-Tangerang, reaching 16.4 thousand tons or 33.06 percent of the total. This was followed by Sentani Airport-Jayapura with 7.2 thousand tons or 14.52 percent of the total.

Freight transported by domestic air from January to May 2026 was 253.1 thousand tons, a decrease of 11.72 percent compared to the same period in 2025. The highest amount of freight was 79.7 thousand tons, or 31.49 percent of the total freight, at Soekarno Hatta Airport-Tangerang. Sentani Airport-Jayapura followed, with 34.6 thousand tons, or 13.67 percent of the total freight.

COSCO SHIPPING Ports Handles 61.3 million Teus in H1 2026

COSCO SHIPPING Ports Limited handled 61.3 million TEUs at the terminals included in its monthly reporting during the first half of 2026, representing an increase of 8.2 per cent year on year.

June throughput reached 10.58 million TEUs, up 6 per cent compared with the same month in 2025, while volumes for the second quarter totalled 31.61 million TEUs, an increase of 7.4 per cent. The figures exclude Qingdao Port International and Container Terminal Tollerort, which do not publish monthly throughput data.

Growth was led by the group's overseas terminals, excluding Container Terminal Tollerort, where throughput rose by 18.4

per cent to 20.5 million TEUs. This made the overseas portfolio the fastest-growing regional grouping within COSCO SHIPPING Ports' monthly data.

CSP Chancay Terminal in Peru recorded one of the strongest increases, handling 201,800 TEUs during the first half, up 68.2 per cent year on year. Suez Canal Container Terminal also reported substantial growth, with volumes rising by 22.9 per cent to 3.04 million TEUs.

In China, terminals in the Pearl River Delta handled 15.58 million TEUs, an increase of 6.5 per cent. Yantian International Container Terminals accounted for 8.35 million TEUs of the regional total, up 10 per cent year on year.

Yangtze River Delta terminals recorded more moderate growth of 3.6 per cent, reaching 8.68 million TEUs. Throughput at Bohai Rim terminals, excluding Qingdao Port International, increased by 5.2 per cent to 9.26 million TEUs.

Performance was weaker in several parts of the portfolio. Southwest Coast throughput, represented by Beibu Gulf Port Co., Ltd., declined by 4 per cent to 4.57 million TEUs.

Dalian Dagang Container Terminal recorded the largest reported decline, with first-half volumes falling by 87.9 per cent to approximately 1,100 TEUs. CSP Abu Dhabi Terminal handled 443,000 TEUs, down 44.3 per cent, representing the steepest decline among the group's reported overseas terminals.

Reefer Terminal S.p.A. in Italy also reported lower volumes, with throughput falling by 23.3 per cent to 20,100 TEUs.

First Call of CMA CGM NOTRE DAME At the Port of Hamburg

The CMA CGM NOTRE DAME, a 400-metre-long and 62-metre-wide vessel operated by the French shipping company CMA CGM, made her first call at the Port of Hamburg on 12 July as part of the rotation of the FAL-3 (French Asia Line) service. With a capacity of 24,212 TEU, CMA CGM NOTRE DAME is currently the largest containership sailing under the French flag and the first in a series of ten identical LNG-powered ultra-large container vessels operated by CMA CGM.

The vessel was officially named in Le Havre on 2 July 2026 and subsequently entered service on the Asia-Northern Europe trade. FAL is one of CMA CGM's key Asia-Europe services, connecting the ports of Ningbo, Shanghai, Yantian, Singapore, Le Havre, Rotterdam, Hamburg and Tangier Med on a rotation of approximately 105 days.

"The maiden call of CMA CGM NOTRE DAME in Hamburg highlights the strategic importance of the Port of Hamburg for the CMA CGM Group. By deploying modern and energy-efficient vessels, we

continue to invest in more sustainable transport solutions while strengthening our long-term commitment to Hamburg. We are pleased to celebrate this milestone together with our partners in the port," said Mirja Nibbe, General Manager CMA CGM Germany.

"We are delighted that CMA CGM is calling at the Port of Hamburg with its latest generation of vessels. The innovations and environmental friendliness of this new series of vessels also reflect Hamburg's commitment to being a progressive and sustainable port. Furthermore, this maiden call by an ultra-large container vessel once again highlights Hamburg's importance as a key hub for trade between Asia and Europe," adds Axel Mattern, CEO of Port of Hamburg Marketing.

CMA CGM NOTRE DAME is powered by liquefied natural gas (LNG) and features an 18,600 m³ LNG fuel tank, an aerodynamic windshield designed to reduce energy consumption, and intelligent energy management systems. The vessel offers capacity for up to 1,600 refrigerated

containers (reefers) and, thanks to an optimized design, can carry 280 more containers than previous CMA CGM vessels of comparable dimensions.

In addition, the vessel is equipped with a fully digitalized bridge, combining real-time navigation tools, augmented reality systems, and AI-enabled solutions to optimize route planning, speed management, and energy consumption.

CMA CGM NOTRE DAME operates under the French flag and is registered with the French International Register (RIF). She is the first vessel in a series of ten sister ships to be delivered between 2026 and 2028, each named after iconic landmarks of French heritage.

The Port of Hamburg is one of Europe's leading hubs for trade between Asia and Europe. With 19 regular container liner services, Hamburg offers extensive connections to Asia's major economic centres. More than half of the port's container throughput - approximately 4.2 million TEU in 2025 - was generated by Asian trade. The deployment of CMA CGM's newest vessel generation on the FAL-3 service to Hamburg, together with the Group's planned acquisition of a 20% stake in EUROGATE Container Terminal Hamburg, underlines the port's strategic importance in global container shipping.

JAXPORT Welcomes New ZIM-MSC Container Service

The Jacksonville Port Authority (JAXPORT) welcomed the Sapphire, the first vessel to call Jacksonville as part of the ZCP-Amberjack container service operated by ZIM Line and Mediterranean Shipping Company (MSC).

The weekly service strengthens Jacksonville's connections with major container gateways across Asia, while providing shippers with expanded access to Latin America, the Caribbean and the Mediterranean through connecting services.

Vessels will call JAXPORT's Blount Island Marine Terminal weekly on a rotation covering Qingdao, Ningbo and Shanghai in China; Busan, South Korea; Manzanillo, Panama; Cartagena, Colombia; Charleston, South Carolina; Savannah, Georgia; Jacksonville; Kingston, Jamaica; and back to Busan.

Importers can expect transit times of approximately 28 to 32 days from North Asia. Through ZIM's transshipment hubs in Kingston and Cartagena, customers also gain onward connections to additional markets, including the west coast of South

America.

Beyond the direct Asia service, the rotation expands transshipment options to Latin America (Venezuela, Ecuador, Peru and Guyana), the Caribbean (including first-time connectivity to Aruba, alongside Curaçao and Panama), the Mediterranean (Italy, Greece, Israel and Egypt), and strengthened Asia connectivity to China, Vietnam and Singapore.

Robert Peek, Chief Commercial Officer at JAXPORT, said: "We're proud to continue building on our longstanding partnership with ZIM and MSC as they expand their service offerings at JAXPORT. This new service provides our customers with reliable connections to key Asian markets and expanded access to international destinations through an established global network. These enhanced capabilities help our customers move cargo more efficiently while strengthening Jacksonville's role as a gateway for global trade."

The vessels deployed on the service are powered by liquefied natural gas (LNG), a cleaner marine fuel, and can be bunkered during their Jacksonville port calls.

OOCL Transpacific Volumes Rebound in Second Quarter

Orient Overseas Container Line's (OOCL) liftings on transpacific routes were 608,979 teu, up 21.5% in the second quarter of 2026, compared to the year-ago period, according to its latest operational update.

The increase on the transpacific routes reverses a 5.9% decline on-year in the first quarter of 2026, giving an overall increase for the first half of 2026 of 7.1% on-year for the routes, to 1.13m teu.

In its Annual Report, Hong Kong-listed OOCL said the primary reasons for a drop in revenue on the transpacific services in 2025 were exceptionally intense market competition, and the impact of sharp, frequent changes in tariff measures throughout the year causing demand volatility and lower US imports. The tariff situation has been more stable in 2026, so far.

Across all of its routes, OOCL's liftings were up by 5.2% in the first half of 2026 to 4.13m teu. Weakest gains were recorded in the transatlantic, where first half volumes were stable, ending up by 0.3% to 284,377 teu.

OOCL reported a similar increase in its first half revenue across all services, up 5.5% to \$4.68bn. The transatlantic was the only route to see revenues fall for the first half of the year, down 2.7% to \$354.5m.

Quarterly revenues rose more aggressively in the second quarter, up by 19.8% overall to \$2.54bn. By route, revenues were up 29.3% for the transpacific, 17.6% for Asia-Europe, and 16.8% for intra-Asia/Australasia, while transatlantic revenues were down 1.3%.

OOCL said the loadable capacity across its service rose by 6.3% during the second quarter, and that average liner revenue per teu was up by 10.1% compared to the same period last year.

Overall average liner revenue per teu increased by 0.2% in the first half, compared to the same period last year, said OOCL.

ONE Revises SCX Rotation with New Danish Port Call

Ocean Network Express (ONE) has announced a terminal switch in Denmark on its Scandinavia Express (SCX) service, replacing Copenhagen with Kalundborg in the port rotation.

The current rotation runs Rotterdam - Gothenburg - Helsingborg - Aarhus - Copenhagen - Antwerp - Rotterdam. Under the new rotation, this becomes Rotterdam - Gothenburg - Helsingborg - Aarhus - Kalundborg - Antwerp - Rotterdam.

The change takes effect from voyage

Penang Bridge 0119N, with the vessel's estimated time of arrival and departure at Kalundborg set for 4 October.

ONE said the update reflects efforts to optimise its network and offer a more dynamic solution to support customers' business needs.

Recently, ONE confirmed a service transition on its West India to/from North America East Coast network, suspending its WIN (West India North America) service and introducing a new INE (India North America Express) service from August 2026.

Minister Eyes Japan as New Market for East Java Mango Exports

Indonesia's Minister of Transmigration, Muhammad Iftitah Sulaiman Suryanagara, is seeking to expand mango exports from East Java to Japan by developing commodity-based economic zones and addressing technical trade barriers.

Japan has been identified as a priority export destination due to its strong demand for premium-quality fruit.

However, Indonesian mango exports to Japan continue to face technical obstacles, particularly those related to fruit fly control.

"One of the main challenges is the fruit fly issue. We are working with various stakeholders to address it. It will require investment, but once this issue is resolved, I am confident the Japanese market will open to Indonesian mangoes," the minister said in a statement on Monday.

Suryanagara said removing these barriers would expand market access for Indonesian mangoes while creating greater added value for farmers and local businesses.

According to the minister, avocado mangoes from Pasuruan District and arumanis mangoes from Probolinggo District, East Java, are highly competitive and have the potential to become flagship Indonesian horticultural exports.

He added that he has frequently presented East Java mangoes to the ambassadors of the United States, China, Australia, and several other partner countries to showcase their quality, receiving highly positive responses.

To support the export drive, the Ministry of Transmigration, together with relevant government agencies, is preparing to develop commodity-based regions that strengthen the entire value chain, from cultivation and processing to marketing and exports.

Suryanagara emphasized that each region will be developed based on its comparative advantage, whether mangoes, durians, coconuts, or other agricultural commodities.

He said the initiative forms part of the government's broader transmigration transformation, which is no longer focused solely on population relocation but also on developing new centers of economic growth.

East Java Deputy Governor Emil Elestianto Dardak welcomed the initiative, saying that improving the competitiveness of the province's flagship products requires collaboration among the government, businesses, the media, and digital content creators.

"We need collaboration. The government, businesses, the media, and digital creators must work together to promote the region's potential more widely," he said.

In April 2024, Indonesia's Quarantine Agency (Barantin) estimated that Japan's annual demand for imported mangoes could reach around 7,000 tons, with a potential market value of approximately Rp140 billion (US\$7.5 million).

At that time, Indonesia was projected to have an initial export capacity of around 600 tons of mangoes, provided all technical export requirements could be met.

Barantin noted that access to the Japanese market requires compliance with several technical requirements, including the registration of orchards, packing houses, and quarantine treatment facilities to ensure the fruit is free from fruit flies.

These requirements are consistent with the efforts currently being pursued by the Ministry of Transmigration to expand market access for East Java's mangoes in Japan. (ANTARA)

Indonesia Eyes Gayo Coffee to Drive Exports, Farmer Incomes

Agriculture Minister Andi Amran Sulaiman said Indonesia will expand Gayo coffee production to boost exports and raise farmers' incomes, as the globally recognized Aceh specialty strengthens the country's plantation industry.

"We are developing Aceh and improving farmers' welfare through Gayo coffee, which is already known worldwide. Our next priority is expanding exports," Sulaiman said on Tuesday.

Coffee cultivation in Aceh has generated about Rp4 trillion (approximately US\$246 million) in economic value, based on local government data, he said.

The government has supported coffee cultivation across about 17,000 hectares, with roughly 17 million coffee trees planted in production centers throughout Aceh.

Sulaiman said plantation expansion will continue next year, provided farmers maintain existing crops to improve productivity.

He also praised the Agriculture Ministry's regional offices in Aceh for strengthening nurseries and providing technical assistance that has improved the quality of coffee plants.

Gayo coffee's strong international reputation gives it significant potential to expand exports while promoting Indonesian coffee in global markets, he said.

Sulaiman said Indonesia's plantation commodity exports reached about Rp40 trillion (approximately US\$2.46 billion) in 2025, with substantial room for further growth.

"We want Gayo coffee to become a global brand. Our plantation exports have reached Rp40 trillion, and we aim to increase that to Rp100 trillion (US\$6.15 billion), or even Rp200 trillion (US\$12.31 billion)," he said. (ANTARA)

CONTAINER SPECIFICATIONS

DRY CARGO CONTAINERS

• DIMENSIONS

Type	Container Weight			Interior Measurement				Door Open	
	Gross (kg)	Tare (kg)	Net (kg)	Length (m)	Width (m)	Height (m)	Capacity (m ³)	Width (m)	Height (m)
20 ft	24,000	2,370	21,630	5.898	2.352	2.394	33.20	2.343	2.280
40 ft	30,480	4,000	26,480	12.031	2.352	2.394	67.74	2.343	2.280

• CHARACTERISTICS

Manufactured from either Aluminium or steel, they are suitable for most types of cargo / general cargo. Aluminium containers have a slightly larger payload than steel, and steel containers have a slightly larger internal cube

REFRIGERATED CONTAINERS

• DIMENSIONS

Type	Container Weight			Interior Measurement				Door Open	
	Gross (kg)	Tare (kg)	Net (kg)	Length (m)	Width (m)	Height (m)	Capacity (m ³)	Width (m)	Height (m)
20 ft	24,000	3,050	20,950	5.449	2.290	2.244	26.70	2.276	2.261
40 ft	30,480	4,520	25,960	11.690	2.250	2.247	57.10	2.280	2.205

• CHARACTERISTICS

Recommended for delicate cargo. Bottom-air delivery system ensures refrigerated cargo reaches its destination in optimum condition.

OPEN TOP CONTAINERS

• DIMENSIONS

Type	Container Weight			Interior Measurement				Door Open	
	Gross (kg)	Tare (kg)	Net (kg)	Length (m)	Width (m)	Height (m)	Capacity (m ³)	Width (m)	Height (m)
20 ft	24,000	2,580	21,420	5.629	2.212	2.311	32.00	2.330	2.263
40 ft	30,480	4,290	26,190	11.763	2.212	2.311	65.40	2.330	2.263

• CHARACTERISTICS

Allowing cargo to be loaded from the top, open top containers are particularly suitable for bulky cargo such as machinery. They are fitted with a PVC tarpaulin cover and attachable bows with cable sealing devices. The container doors can be removed to make the stuffing of cargo more convenient. Manufactured from steel

FLAT RACK CONTAINERS

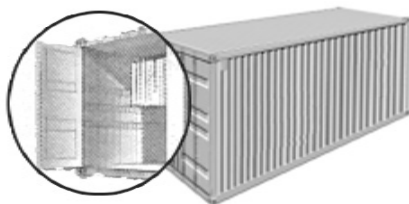

• DIMENSIONS

Type	Container Weight			Interior Measurement			
	Gross (kg)	Tare (kg)	Net (kg)	Length (m)	Width (m)	Height (m)	Capacity (m ³)
20 ft	30,480	2,900	27,580	5.624	2.236	2.234	27.90
40 ft	34,000	5,870	28,130	11.786	2.236	1.968	51.90

• CHARACTERISTICS

Flatracks are especially suited to heavy loads or cargo that needs loading from the top or sides, such as pipes and machinery. There are collapsible and non-collapsible containers with or without walls. Manufactured from steel.

GARMENT CONTAINERS

• DIMENSIONS

Type	Container Weight			Interior Measurement				Door Open	
	Gross (kg)	Tare (kg)	Net (kg)	Length (m)	Width (m)	Height (m)	Capacity (m ³)	Width (m)	Height (m)
20 ft	24,000	2,240	21,760	5.898	2.352	2.394	33.20	2.343	2.280
40 ft	30,480	3,885	26,595	12.031	2.352	2.394	67.74	2.343	2.280

• CHARACTERISTICS

Use for all kinds of garment. The containers are specially designed for garment product and related industry. There are some options of using a string or bar system or a combination of both. The containers allow increased flexibility, greater load Internal Capacity and savings on transportation and handling cost.

HIGH CUBE CONTAINERS

• DIMENSIONS

Type	Container Weight			Interior Measurement				Door Open	
	Gross (kg)	Tare (kg)	Net (kg)	Length (m)	Width (m)	Height (m)	Capacity (m ³)	Width (m)	Height (m)
40 ft	30,480	3,980	26,500	12.031	2.352	2.698	76.30	2.340	2.585
45 ft	30,480	4,800	25,680	13.544	2.352	2.698	86.00	2.340	2.585

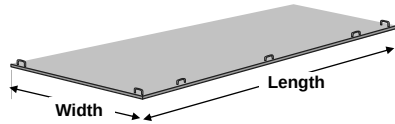

• CHARACTERISTICS

With high cube containers, you gain an extra foot in height compared with general-purpose containers. Ideal for light, voluminous cargo or bulky cargo. These extra volume containers come in steel and aluminium.

Note : For Reference only. Please contact your shipping companies or forwarders for more details.

The following guide has been developed from materials supplied by IATA (International Air Transport Association) and the ATA (Air Transport Association of America). This guide lists and illustrates the average external dimensions and weight limitations of the primary containers in use today. Exact dimensions and weight limitations will vary by manufacturer and availability will vary. Therefore please inquire the precise specifications with your airline or freight forwarder when arranging your shipment.

COMPLETELY REFINED
Even More User Friendly & Efficient

Positive Information, Positive Thinking, Positive Performance

www.ScheduleBlast.com - a top-notch vertical industry portal for sailing schedules and transport strategies - is now even more user-friendly and efficient thanks to its Smart Port-to-Port Schedule Search that is available in English and Chinese versions. So, any shipper can freely enjoy the benefits of sailing schedules and other cargo/freight enquiry services.

Indonesia Eyes China, Middle East for Poultry Exports

Indonesia's Deputy Minister of Agriculture Sudaryono said the country continues to explore export opportunities for poultry products to China and the Middle East.

The initiative aims to expand market access, absorb domestic production surpluses, and improve the welfare of local poultry farmers.

"The Ministry of Agriculture is actively exploring export opportunities for poultry products to various countries, including China and the Middle East, amid rising global food demand in the international market," Sudaryono said in a statement released here on Saturday.

The deputy minister noted that Indonesia's poultry sector is currently experiencing an oversupply.

However, he described the abundant supply of chicken and eggs as a positive indicator of the country's strong production capacity.

He said the government's main challenge is to improve distribution and maintain balance in the domestic market.

"This is actually a good problem to have. The products are readily available. It is just a matter of how we manage supply, demand, and distribution to ensure stocks are distributed evenly across the country," he said.

Sudaryono stated that the ministry is continuing to expand access to export markets as a long-term solution to maintain the supply-and-demand balance, while simultaneously strengthening the global competitiveness of Indonesia's poultry industry.

Securing export markets, he added, depends not only on business considerations but also on strong diplomatic relations.

Therefore, the government continues to strengthen bilateral and multilateral cooperation to open up more international markets for Indonesian agricultural products.

Furthermore, the ministry is coordinating closely with the National Nutrition Agency (BGN) to ensure that the government's Free Nutritious Meal (MBG) program maximizes the absorption of domestic food commodities, particularly chicken and eggs, whenever farm-gate prices decline.

Deputy for Food Availability and Stabilization at the National Food Agency (Bapanas) I Gusti Ketut Astawa said that the average farm-gate price of broiler chickens has increased by 4.11 percent over the past week.

Based on the agency's data as of July 14, 2026, the national average price for live-weight broiler chickens stood at Rp21,736 per kilogram (kg), up from Rp20,878 per kg the previous week. (ANTARA)

Indonesia Steps Up Muntok White Pepper Exports

Indonesia's Animal, Fish, and Plant Quarantine Agency in Bangka Belitung Islands Province is strengthening oversight of Muntok white pepper exports to encourage farmers to continue developing the region's flagship export commodity.

"The international market continues to show strong demand for white pepper," Head of the Bangka Belitung Islands Quarantine Agency Herwintarti said in a statement on Sunday.

The Quarantine Agency, in collaboration with the Bangka Belitung Islands provincial government, has intensified support for white pepper exports through the Go Export Program to maintain farmers' enthusiasm for cultivating the commodity.

"The export potential of white pepper remains very high, and we want this commodity to continue as one of the provincial government's priority programs to improve both production and quality," she said.

According to data from Best Trust (Barantin Electronic System for Transaction and Utility Service Technology), white pepper exports from Bangka Belitung reached 1.37 thousand tons through 184 shipments in 2025, with a total value of Rp180 billion (approximately US\$9.7 million).

Domestic distribution of white pepper reached 6,323 tons through 308 shipments, with a total value of Rp535.89 billion (approximately US\$28.8 million).

"The main export destinations for Bangka Belitung's white pepper include Vietnam, Singapore, Japan, Malaysia, and Taiwan," Herwintarti said.

Meanwhile, Head of the Bangka Belitung Islands Agriculture and Food Security Agency (DPKP) Kurniawan said the provincial government continues to develop smallholder pepper plantations to increase production of the export commodity.

Based on provincial agricultural data, white pepper plantations in 2025 totaled 9,646.96 tons, spread across Bangka District (1,198.68 tons), Belitung (3,831.82 tons), West Bangka (115.91 tons), and Bangka Belitung (115.91 tons).

Furthermore, Central Bangka District recorded 161.36 tons, South Bangka District recorded 3,331.45 tons, and East Belitung District recorded 1,007.73 tons.

In comparison, white pepper production in 2024 reached 12,008.66 tons, comprising 878.78 tons in Bangka District, 4,321.86 tons in Belitung District, 1,502.70 tons in West Bangka District, 225.60 tons in Central Bangka District, 3,893.06 tons in South Bangka District, and 1,186.66 tons in East Belitung District.

"The decline in white pepper production was mainly caused by the shrinking plantation area due to land conversion to oil palm plantations and other uses," Kurniawan said. (ANTARA)

The Ministry of Transportation Promotes Integrated Ports to Support National Logistics-Food

The Ministry of Transportation (Kemenhub) encourages the transformation of green and smart ports to strengthen the logistics system, facilitate food distribution, increase service efficiency, and support sustainable national economic development.

"We continue to encourage the transformation of national ports through the development of sustainable green and smart ports," said Minister of Transportation Dudy Purwaganti, as reported by ANTARA, July 18.

The Minister of Transportation emphasized this during the "Green and Smart Port Initiatives - ASRI 2026" event in Gresik, East Java.

Through this program, the Ministry of Transportation presents a port system based on the integration of environmental sustainability and technological innovation.

Dudy said the ASRI green and smart port program (Safe, Healthy, Resilient, Beautiful) 2026 is one of the important achievements in realizing a more sustainable port.

This step is an important part of strengthening the national logistics system, maintaining the smooth distribution of food, and supporting Indonesia's economic growth. Cabang Eksekutif

"We encourage other ports to immediately follow this ASRI movement, so that the President's program can be achieved and in the future also includes all transportation activities," said Dudy.

The strengthening of the ASRI port includes energy efficiency, carbon emission reduction, waste management, operational digitization, and logistics system integration to make the port greener, smarter, and more competitive.

He emphasized that the Ministry of Transportation would continue to encourage the implementation of ASRI values in all transportation sectors.

"In the future, not only sea transportation, but also other transportation activities can follow, and we will continue to encourage this so that the ASRI movement can be achieved quickly," explained Dudy.

The program is also in line with the national development direction which places food security as a priority. A reliable logistics system is the key to ensuring that food distribution takes place quickly, efficiently, safely, and evenly throughout Indonesia.

As a form of appreciation for the commitment of port personnel, in 2026 the Green and Smart Port ASRI 2026 will be held again. The award program is designed to encourage ports in Indonesia to implement the principles of sustainability, digitization, operational efficiency and responsible governance. Makanan

From 2019 to 2025, there have been 41 ports that have participated in the green and smart port assessment. This year, there are eight ports that received the Green and Smart Port 2026 award.

The eighth includes PT Petrokimia Gresik, PT Pupuk Kalimantan Timur, PT Krakatau Bandar Samudera, PT Vale Indonesia, PT Pelindo Petikemas - TPK Banjarmasin, PT Indonesia Kendaraan Terminal, PT Pelindo Multi Terminal - Branch Tanjung Intan and Bitung Petikemas Terminal.

Meanwhile, Coordinating Minister for Food Zulkifli Hasan emphasized that ports have a strategic role not only as a place to unload goods, but also as a main node in the national food logistics system.

"Ports connect production centers, industrial areas, distribution centers, to consumption areas, so it is very important to determine the smoothness of supply, reduce price disparities and maintain food stability," said Zulkifli.

Zulkifli said that the transformation of the logistics sector can no longer be done in conventional ways. According to him, the big challenges ahead must be answered with gradual updates so that national competitiveness is stronger.

Singapore Container Throughput Rises 3.2% As Bunker Sales Reach 4.67m Tonnes in June

Singapore's container throughput increased 3.2% year on year to 3.83m TEU in June, while marine fuel sales rose 1.6% to 4.67m tonnes, according to the Maritime and Port Authority of Singapore.

Vessel arrival tonnage climbed 6.5% to 279.83m gross tonnes during the month, while the number of vessel arrivals increased 6.3% to 11,520.

Total cargo throughput declined 1.4% from a year earlier to 49.21m tonnes. Singapore sold 4.669m tonnes of bunker fuel in June.

Conventional fuels accounted for 4.577m tonnes, while LNG sales reached 55,000 tonnes and biofuel volumes totalled 38,000 tonnes.

The underlying MPA spreadsheets classify the June figures as preliminary and subject to revision when additional information becomes available.

The bunker totals include delayed submissions declared by fuel suppliers.

The monthly figures follow Singapore's 2025 performance, when the port handled 44.66m TEU, vessel arrival tonnage reached 3.22bn GT and marine fuel sales totalled 56.77m tonnes.

The three indicators increased 8.6%, 3.5% and 3.4%, respectively, from 2024.

Established in 1996, the Maritime and Port Authority of Singapore is the country's maritime and port regulator and planner. Its statutory functions include developing the Port of Singapore and overseeing maritime safety, digitalization and decarbonization initiatives.

Peak Season Starts Early for Freight Markets with Strong Demand - DHL

Air and ocean freight markets are seeing tight capacity, congestion at major hubs, and increasing vessel utilization as demand spikes earlier than the usual start of the industry's peak season, according to DHL's latest reports.

"Traditionally, freight demand builds gradually in the second half of the year as retailers replenish inventories ahead of major shopping events and manufacturers prepare for year-end demand. Capacity tightens, rates rise, and competition for space intensifies," Niki Frank, CEO of DHL Global Forwarding Asia Pacific, said in a statement. "This year, those familiar pressures are emerging earlier-and for reasons that extend far beyond traditional seasonal cycles. An intense and prolonged peak season is already underway due to the convergence of several demand drivers."

Apart from the usual holiday inventory replenishment, the demand drivers now include an increase in new energy exports such as solar-related products and electric vehicles, and importers in the United States rushing to bring cargo in ahead of tariffs uncertainty.

DHL said while tariffs are no longer the main factor affecting the freight market, these still have an impact on shipping activities.

The U.S. 10% Section 122 tariff is expiring on July 24 July, creating uncertainty into procurement and sourcing decisions.

"Importers know what current tariffs look like. What they do not know is what comes next-or how additional costs might be introduced from future measures. Some shippers are responding by moving cargo earlier, preferring the certainty of today's tariff environment over the uncertainty of tomorrow's," DHL said.

This means added upward pressure on ocean freight rates that are already at elevated levels. In air freight, it becomes an additional planning variable for a market that is also under high rates.

At the same time, exports continue to flow

despite continued geopolitical uncertainty and shifting trade relationships.

"Individually, each of these developments would be manageable," said Bjoern Schoon, senior vice president for Ocean Freight, DHL Global Forwarding Asia Pacific. "Collectively, they are creating a market where demand is growing faster than what capacity can comfortably absorb."

As freight spaces tighten, prices are increasing. Ocean freight rates have risen 84% year-on-year, while demand continues to outpace available capacity. DHL's June Air Freight State of the Industry notes that global air freight spot rates also rose to US\$3.75 per kilogram in week 25 of 2026, remaining 47% above last year's levels, reflecting volatility, capacity uncertainty, high jet fuel prices, and risk surcharges.

Solar, EV demand

The freight markets are also seeing an unprecedented rise in "New Energy" supply chains, which are mostly coming from China.

The demand has been partly driven by rising energy costs due to higher oil prices prompted by the Middle East crisis.

For freight markets, this matters because New Energy cargo does not follow the same calendar as traditional retail demand, DHL said.

"Batteries, energy storage systems, solar equipment, and industrial energy infrastructure move according to project timelines, investment cycles, and deployment schedules. Rather than replacing existing freight demand, they are creating an additional layer of cargo that remains active throughout the year," it said.

Congested sea and air ports

Demand growth has been particularly strong on Asia-origin trade lanes, with year-to-date intra-Asia volumes up 10%, Asia-Europe up 12%, and Asia-Oceania up 17%.

That trend aligns with a broader conclusion from the 2026 DHL's Global Connectedness Report: globalization is

adapting rather than retreating. Supply chains are becoming more diversified, but goods continue moving across borders at scale.

And such growing demand amid limited capacity has prompted an increasingly visible impact on ports.

DHL's Ocean Freight Market Update shows more than 3.7 million twenty-foot equivalent unit (TEU) tied up in congested ports globally in late June, with congestion levels returning to heights last seen during the post-pandemic period.

Despite the expected global container fleet growth of 4% in 2026, effective capacity remains constrained by congestion and ongoing network disruptions, DHL said.

Similarly, DHL's Air Freight State of the Industry report show that while airline networks continue recovering and capacity continues to grow, space availability remains tight on many trade route.

Airlines are concentrating capacity on the highest-demand corridors while aircraft delivery delays and a global order backlog of more than 18,000 aircraft continue limiting supply growth.

Pressure on capacity is also largely due to strong demand in semiconductor and advanced manufacturing supply chains as well as AI-related demand. At the same time, manufacturers, industrial exporters, and e-commerce shippers continue competing for available space.

"When available capacity is concentrated on higher-demand corridors, price increases become less of a surprise and more of a reflection of how tight networks are being used," said Fabio Weiss, senior vice president, Air Freight, DHL Global Forwarding Asia Pacific.

The ocean and air freight markets are being shaped by what DHL calls "a convergence of forces" - holiday inventory, tariff uncertainty, growing demand for new energy and technology products, combined with capacity constraints and congestion.

"Together, they help explain why peak season have arrived early-and why the competition for freight capacity may remain intense well beyond the summer months," Frank said.
